A good workman-like effort but certainly not life-changing (4 stars to collectors) By Zenticant Pangolin I bought this book on the wildly enthusiastic endorsement of it by a medals dealer (who just happens to specialize in one of the entries). While I agree this book is good for the hobby and is not a bad effort; owning it is not a wholly satisfying experience. First the good stuff: The authors have done a fine job of compiling the list of 100 different medals and tokens representative of a broad spectrum from the mundane to the sublime. They also did a generally good job with the background essays on their selections because they are easy to read and sometimes informative. Cross reference numbers from numbering systems found in various books that have catalogued the items are supplied, as are population estimates and some then current pricing information. The presentation and layout of the book are also outstanding. Actually, the book is a pleasure to look at because the full color reproductions are excellent and the layout is top notch. In fact, I like almost everything about the book so why only three stars? This is a three star book because while it is very likable, it really isn't lovable. This is because the

editors didn't give us enough of the kind of information that makes a thing the 'Greatest'. Just throwing together a collection of 100 different examples within a genre because a survey of experts tells one to isn't reason enough, in my opinion. The book misses the kind of background stories that caused the collectors, writers and dealers to love them enough to vote them as '100 Greatest'. For instance, I too love the Higley Coppers found on pps. 14-15. I think they are cute and cuddly but I want to know why Samuel Higley was compelled to mint his own coins, for God's sake. What about the coin shortage at the time; how they were used; was there any competing specie circulating at the time? Or take entry No. 47, 'George H. Lovett's Nod to Coin Collectors' which is a fine entry but no mention is made of the Lovett family's long and illustrious relationship to the medallic arts which is doubtless why the medal was voted on the list. This book misses the inside information that personalizes what are otherwise just objects. Granted, many of the book's entries are beautiful works of art, but mere beauty is not enough to carry a project such as this. Rest assured that the world teems with beautifully struck medals, aesthetically pleasing medals but this doesn't necessarily make them deserving of greatness. Also this book is Made in China. One day China may produce high quality art books but today is not that day. As a book collector it is of utmost importance that art books such as this are produced with the best of values from the best of materials and this book, sadly, was not. Just three stars, my friends, but I do agree with the reviewers below this is a great library book. 0 of 1 people found the following review helpful. American Medals Book By David Goodman 100 Greatest book series is one of the best and thorough book series I know of. The authors of the individual books are the experts in their fields. Well illustrated with generous information on each subject. Top notch 0 of 1 people found the following review helpful. The Best Examples Of Numismatic Art By leftyA must for Exonumia collectors. It was good to see some of my holdings, and I'm sure other readers items, included in the top 100. Beautiful printing job.

Katherine Jaeger and Q. David Bowers tell the fascinating stories of 100 of the greatest medals and tokens of colonial America, the early states, the Confederacy, the U.S. Mint, and dozens of private issuers. It's all here: the history of medals and tokens in America and how they evolved; how to collect them; grading; conservation; smart buying; and more. 100 Greatest American Medals and Tokens is not just a price guide or a fancy picture book. It's a time machine that takes you to a hundred-plus different points in America's rich history. Hardcover with dustjacket, coffee-table, 148 pages.
