S.P. Fjestad : 4th Edition Blue Book of Tactical Firearms Values before purchasing it in order to gage whether or not it would be worth my time, and all praised 4th Edition Blue Book of Tactical Firearms Values:

0 of 0 people found the following review helpful. Five StarsBy Carl BloomExcellent, much more information than I expected.0 of 0 people found the following review helpful. Get this book before you buy a tactical firearmBy John MatlockTactical firearms, be they rifle (200+ manufacturers of AR-15 like guns), shotgun (many pump action guns with short barrels some with pistol grip stocks, plus several special design too specialized to describe here), or pistols of all different size, shape, color and caliber. As this book says, the definition of tactical, like beauty, is in the eye of the beholder. It then goes on for two pages defining their definition of tactical which is usually something like having three or four of the following six or eight features. Or perhaps tactical is like the supreme court comment on pornography, you can't define it but you know it when you see it.Anyway, whatever you call them, the thousands of guns in this book are briefly described and an estimate of value is given based on sales to retail customers at gun shows, dealers, gun auctions, etc. Sometimes I question some of the prices because there are a lot of guns you just

don't see very often and they usually give seven prices of each gun based on condition. On infrequently seen guns like say the Sterling manufactured AR-180 assault rifle or the High Standard 10B, how could you find guns at all those individual finish conditions. At the last big gun show I attended, I saw exactly one AR-180 and no 10B's. The AR-180 though, was priced pretty close to what the book says it should cost. If I were interested in purchasing an AR-15 style rifle, I'd buy this book first. That way you'd have at least an idea of what you should have to pay for the gun. You could save a lot of money. After all, this is what the seller used to set a price on his gun.

The newly revised 4th Edition of the Blue Book of Tactical Firearms Values by S.P. Fjestad is finally here! This new edition contains significantly updated values and information reflecting new changes in the gun industry. Features of the new Blue Book of Tactical Firearms Values: New 2013 makes and models, as well as up-to-date pricing on current and discontinued models! Provides extensive information on over 150 AR-15 and AK-47 manufacturers/importers! More information, more values, and more history than any other guide on the market, by far! Includes extensive Trademark Indexes providing contact information for both firearms manufacturers and accessories no other publication even comes close!
