William C Gallagher : Modern Toys from Japan: 1940s-1980s (Schiffer Book for Collectors) before purchasing it in order to gage whether or not it would be worth my time, and all praised Modern Toys from Japan: 1940s-1980s (Schiffer Book for Collectors):

Known as the "Modern Toy" company from their trademark, the Masudaya Toy Company, Japan's oldest, was started in 1724 and is still in existence. The popular toys they have produced -- including aircraft, boats, cars, trucks, military vehicles, people, household appliances, space exploration, and much more -- depict real life events and have stimulated imaginations for centuries. This outstanding book is the first on Japan's leading toy maker and worldwide

exporter. It features over 1200 photos of colorful and charismatic toys, most dating from the 1950s to the 1970s, the "Golden Age" of Japan's leading export. Toys produced into the early 1980s, including those for foreign markets, are included as well. Descriptions for over 1800 toys include their years of production, type of action, size, and current value. This essential reference guide will appeal to specialized and general toy collectors alike.
